DAAD Scholarship - Working Internships in Science and Engineering  
(WISE)

Dear Professor Rao

It's our pleasure to inform you that DAAD has announced its prestigious internship programme "Working Internships in Science and Engineering" (WISE) for undergraduates again this time of the year. The scholarship programme is open for B.Tech students in their 5th or 6th semester and for dual degree/ integrated programme students in their 5th, 6th, 7th or 8th semester for carrying out a 2-3 months research internship at German universities/government funded research institutes.

Over the last six years, i.e., since 2007 numerous undergraduate students have benefitted from this programme by gaining professional knowledge and skills after completing their internship under the guidance of German Professors.

Applications are invited from 76 Institutes all over India, including your Institution.

Thanks to your kind support we received over 400 applications last year and we are glad to inform you that approx. 200 scholarships were awarded in response to these applications. We look forward to a similar response this year as well.

We are enclosing a copy of the announcement of this programme for your information.
